JOURNAL OF MILK AND FOOD TECHNOLOGY

Index to Volume 32

AUTHOR INDEX

ABRAHAMSON, ABRAHAM E., responsibilities for milk production and quality control, 350

ALBRIGHT, J. L., (see Dillon, 224)

ANDERSON, ELMER O., (see Hankin, 49)

ARMSTRONG, J. G., (see Maloney 394, 455)

ARUANND, JORGE, (see Rotstein, 79)

ATHERTON, H. V., (see Duthie, 147)

AYRES, JOHN C., practical control of salmonellae, 126

BAKER, R. C., (see Vadehra, 362)

BAKING INDUSTRY SANITATION STANDARDS COMMITTEE, sanitation standards, 52, 56, 137, 251

BARNUM, HAROLD J., letter to editor, 219

BARRINGER, J. C., are we professionals, 69

BECK, LYLE D., (see Jensen, 18)

BEHLOW, ROBERT F., dairyman's plight in modern agriculture, 405

BERMAN, *D. T.*, (see Nageswararo, 261; Ward, 259)

BEVINS, ROBERT J., sanitarian and community development, 226

BJORNSON, B. F., (see Pratt, 220)

BLACKWELL, F. ORIS, biggest problem in food hygiene-people, 172

BRANDT, K. R., (see Groninger, 1)

BROWN, C. M., (see Dillon, 224)

BRYAN, FRANK L., use of visual aids in training food service management in food-borne disease control, 245; what the sanitarian should know about perfringens food poisoning, 381

CALBERT, H. E., (see Goel, 312; Nageswararao, 365)

CALL, ARA O., (see Price, 304)

CALLAGHAN, C. J., (see Dillon, 224)

CAMPBELL, JEPTHA E., (see Lewis, 133)

CHOU, C. C., comparison of direct plating and enrichment methods for recovery of staphylococci from frozen feeds, 398; microbiology of some frozen and dried feeds, 372

CLARK, W. S., JR., (see Hartley, 32; Reinbold, 42)

CLIVER, D. O., surveillance methods for viruses in foods, 421

COMMITTEE ON MANPOWER DEVELOPMENT AND UTILIZATION, amended report of the committee on manpower development and utilization-engineering and sanitation section, American Public Health Association, 339

CULBERTSON, F. W., letter to editor, 219

DABBAH, ROGER, reszaurin reduction test applied to manufacturing grade milk, 44

DELMORE, FRED J., self certification in the voluntary compliance program, 60

DEMOTT, B. J., freezing point of milk affected by changing from dry-lot feeding to pasture, 210

DENISTON, O. LYNN, evaluating performance of a food sanitation program, 115

DERBYSHIRE, J. B., (see Nageswararao, 261)

DESIEGHARDT, FRED O., sanitation in single service container and closure industry, 329

DICKERSON, R. W., JR., (see Scalzo, 20)

DILLON, W. M., influence of narrow and wide bore inflations on udder health, 224

DUTHIE, A. H., comparison of Vermont and other tests to determine fat in skimmilk, 147

EDMONDSON, J. E., (see Mallett, 176)

FISHER, PERRY, recent developments in residual insecticides, 253

FLAKE, J. C., progress in control of abnormal milk, 138

FOLTZ, V. D., (see Sims, 485; Smutz, 446)

FOULKES, P. H. (see Duthie, 147)

FUNG, DANIEL Y. C., microtiter method for enumerating viable bacteria in milk, 144; rapid determination of viable cell count with the microtiter system and MPN technique, 408

GINN, ROY E., comparison of Milko-Tester and Babcock methods for testing commercial milk samples, 203

GOEL, M. C., manufacture and keeping quality of low fat dairy spread, 312

GOEPFERT, J. M., fluorescent antibody technique for salmonella detection, 465

GRINDROD, J., (see Cliver, 421)

GRONINGER, H. S., degradation of adenine nucleotides in crab during storage and cooking, 1

HALL, HERBERT E., detection of *Clostridium perfringens*, 426

HANKIN, LESTER, application of oxidase test to refrigerated delicatessen foods, 122; correlations between flavor, standard plate count, and oxidase count of pasteurized milks, 49

HARGROVE, R. E., survival of salmonellae in Cheddar and Colby cheese, 480

HARTLEY, DAVID E., vending machine sanitation and safety, 474

HARTLEY, J. C., bacterial tests to measure milk quality, a review, 4; effects of time and temperature of milk sample storage on tests results, 37; medium and incubation temperature affect recovery of microorganisms from milk, 90

HEDRICK, T. I., air quality in dairy plants, 265

HELDMAN, D. R., (see Hedrick, 265)

HINTON, S. A., (see Demott, 210)

HOLMES, EDWARD L., role of industry sanitation consultant in food plant sanitation, 295

HYDER, K., (see Vanderzant, 390)

INOUE, YUZO, dairy industry in Japan, 3

INSALATA, N. F., (see Goepfert, 465)

JENSEN, CHRISTEN, correlation of four mastitis tests to leucocyte count, 18

JOHNS, C. K., (see Reinbold, 42), can cows cause high counts?, letter to editor, 441; tests for estimating shelf-life of milk products, 301

JOHNSON, SHELBY, past, present, and future of National Conference on Interstate Milk Shipments, 431

JONES, G. A., (see Yang, 102)

JORDAN, W. K., (see Zall, 197)

KAUFMAN, VERN F., detection of leaks in egg pasteurizers, 94

KELLEY, D. C., (see Sims, 485)

KIRKHAM, W. W., (see Dillon, 224)

KOREN, HERMAN, environmental health practitioner today and tomorrow, 28; Indiana State University's program in environmental health, 489

KRAFT, ALLEN A., (see Fung, 408)

LAGRANGE, WILLIAM S., (see Fung, 144)

LAWTON, W. C., production and processing standards for imitation and filled dairy products, 321

LEWIS, KEITH H., recent developments in prevention of food-borne diseases, 133

LEWIS, ROGER, need objectives to form new association, 41

MALLETT, D. L., recovery of coliforms from milk using incubation at 32 and 37 C, 176
MALONEY, P., estimation of extraneous matter in milk, cream, and butter, 394; mixed sample tests for extraneous matter in milk, 455
MARSHALL, R. T., (see Mallett, 176)
MARTH, E. H., (see Chou 372, 398; Goel, 312; Shih, 213)
MATTINGLY, W. A., (see Hargrove, 480)
MAXCY, R. B., post-pasteurization contamination detected by surface plate method, 206; residual microorganisms in CIP systems for milk, 140
MCCAFFREY, J. C., proceedings of the 12th National Conference on Interstate Milk Shipments, 290
MCDONOUGH, F. E., (see Hargrove, 480)
MCKAIG, DIANNE, eat, drink, and be wary, 66
MICKELSON, ROSS, (see Smutz, 446)
MOATS, W. A., (see Dabbah, 44)
MONTGOMERY, M. J., (see Demott, 210)
MOSSEL, D. A. A., microbiological quality control in the food industry, 155
NAGESWARARAO, G., comparison of screening tests to detect abnormal milk, 365; sources and mechanism of catalase activity in catalase test for abnormal milk, 261
NAMOR, MELHEM S. S. (see Rotstein, 79)
NICKELSON, R., (see Vanderzant, 319, 357)
NICOLAI, JOHN H., mastitis can be controlled, 403
NOLES, S. O., presidential address, fifty-sixth annual meeting of IAMFES, 410

POSTLE, D. S., (see Ward, 259)
PRATT, HARRY D., vector control today, 220
PRICE, WALTER V., raw and heated milks affect Cheddar cheese ripening and quality, 304
PRINCE, GALE, sanitation in retail food industry, 452
READ, R. B., JR., (see Scalzo, 20)
REINBOLD, G. W., (see Hartley, 4, 37, 90), modification of preliminary incubation procedure, 42
ROGERS, HATTON B., protein for spark and explosion, 218
ROTSTEIN, ENRIQUE, chemical and physical characteristics of apples, 79
SCALZO, A. M., method to measure dish temperature in commercial dishwashers, 20
SCHULTZE, W. D., minimizing variations in direct microscopic somatic cell count, 477
SHIH, C. N., improved procedures for measuring aflatoxins using thin layer chromatography and fluorometry, 213
SICA, ANA M., (see Rotstein, 79)
SIMS, J. E., survival of salmonellae in butter, 485
SMITH, J. W., (see Schultze, 477), direct microscopic somatic cell count, 434
SMUTZ, CYNTHIA A., microbiology of imitation and filled dairy products and their components, 446
STEELE, F. R., JR., (see Vadehra, 362)
STEVENS, ROBERT A., (see Novick, 354)
TATINI, S. R., (see Dabbah, 44)
THOMPSON, D. I., letter to editor, 473
THOMPSON, HAROLD E., JR., Public Health Service report to the National Conference on Interstate Milk Shipments, 492
TOWNLEY, DONALD A., solid wastes problems and programs, 63
ULLMANN, WILLIAM W., (see Hankin, 122)
VADEHRA, D. V., shelf-life and culinary properties of thawed frozen pasteurized whole egg, 362
VANDERZANT, C., comparison of oxidase and Wisconsin Mastitis tests for detection of abnormal milk, 319; influence of conditions of rehydration on enumeration of bacteria from freeze-dried model food systems, 390; microbiological examination of muscle tissue from beef, pork, and lamb carcasses, 357
VEDAMUTHU, E. R., (see Hartley, 4, 37, 90)
VITALE, FRED R., alignment of industry-oriented sanitation program, 179
WARD, G. E., recovery of *Streptococcus agalactiae* from a herd with low level of infection and a method for surveillance after elimination of infection, 259
WEAKLEY, DAVID J., (see Overcast, 442)
WEIK, ROBERT W., Food and Drug Administration attitudes on imitations, 448
WEINLAND, K. M., (see Dillon, 224)
WEISSE, HARLEY A., high-pressure low-volume mechanical recirculating cleaning, 346
WELCH, WILLIAM V., (see Deniston, 115)
WHITEHEAD, DICK B., mechanical recirculation cleaning, 347
WILLSON, L. S., effective communications, 26
YANG, HO-YU, characteristics of enteropathogenic and other coliform bacteria recovered from Canadian dairy products, 102
ZALL, R. R., monitoring milk plant waste effluent, 197

SUBJECT INDEX

Abnormal milk, see Mastitis
Adenine nucleotides, degradation in crab, 1
Aflatoxins, improved methods for measurement, 213
Air, quality of in milk plants, 265
Apples, chemical and physical characteristics of, 79
Babcock fat test, compared to Milko-Tester, 203
Bacteria
  Clostridium perfringens, 381, 426
  coliforms, 102, 176
  salmonella, control of, 126
  Streptococcus agalactiae, 259
  in air, 265
  in beef, 357
  in butter, 485
  in CIP systems, 140
  in cheese, 480
  in dried feeds, 372
  in foods, 155
  in frozen feeds, 372, 398
  in imitation and filled dairy products, 446
  in lamb, 357
  in low fat dairy spread, 312
  in meat, 357
  in model freeze-dried foods, 390
  in pasteurized dairy products, 102
  in pasteurized milk, 49, 90, 176
  in pork, 357
  in raw milk, 4, 16, 37, 42, 90, 144, 176, 323
  in thawed frozen eggs, 362
Bacteriological methods
  aureomycin-rose bengal agar for yeasts and molds, 442
  detection of *Clostridium perfringens*, 426

direct microscopic somatic cell count, 434, 477
estimating shelf-life of dairy products, 301
evaluation of raw milk quality, 4
fluorescent antibody technique, 465
medium and incubation temperatures for plate counts of milk, 90
microtiter method
applied to milk, 144
combined with MPN procedure, 408
oxidase test
for pasteurized milk, 49
for refrigerated foods, 122
preliminary incubation of raw milk, modified, 42
recovery of staphylococci from frozen meat byproduct, 398
rehydration methods to recover bacteria, 390
resazurin test for manufacturing milk, 44
surface plate method to determine contamination, 206
time and temperature of raw milk sample storage, 37
Baking industry, sanitation standards, 52, 56, 137, 251
Beef, bacteria in, 357
Book review, *Agricultural Sciences and the World Food Supply*, 335
Butter, survival of salmonellae in, 485
California mastitis test, compared to other mastitis tests, 18, 365
Catalase test
compared to other screening tests, 365
sources and mechanism of catalase activity, 261
Cheese, Cheddar
made from raw and heated milk, 304
survival of salmonellae in, 480
Cheese, Cottage, yeasts and molds in enumerated with aureomycin rose bengal agar, 442
Chemical methods
aflatoxin measurement, 213
applied to apples, 79
applied to Cheddar cheese, 304
catalase test, 261
fat tests for skimmilk, 147
mastitis tests, correlation among, 18, 365
Milko-Tester and Babcock fat tests compared, 203
Chromatography, thin layer, for aflatoxin measurement, 213
Cleaned-in-place systems, bacteria in, 140
Cleaning, recirculating mechanical, 346, 347
Coliform bacteria
characteristics of some from dairy products, 102
in frozen and dried feeds, 372
recovery at 32 and 37 C incubation, 176
Communication
effective must be two-way, 26
visual aids in training program, 245
Consumer protection, eat, drink, and be wary, 66
Crab, degradation of adenine nucleotides in, 1
Dairyman, problems of in modern agriculture, 405
Dairy spread, low fat, manufacture and keeping quality of, 312
Direct microscopic somatic cell count
development and evaluation, 434
minimizing variation in, 477
Dishwashers, temperature in, 20
Eggs
pasteurizers, detection of leaks in, 94
shelf life and culinary properties of frozen, 362
Environmental health
practitioner today and tomorrow, 28
program at Indiana State University, 489
solid wastes problems and programs, 63
Extraneous matter
in milk, tests for, 455
in milk, cream, and butter, tests for, 394
Fat tests
applied to skimmilk, 147
Milko-Tester and Babcock methods compared, 203
Feeds
dried, microbiology of, 372
frozen
microbiology of, 372, 398
salmonellae in, 372
staphylococci in, 372, 398
Feulgen-DNA test, compared to other mastitis tests, 18, 365
Filled dairy products
FDA attitudes on, 448
microbiology of, 446
production and processing standards for, 321
Fish byproducts
microbiology of, 372
salmonellae in, 372
staphylococci in, 372
Fluorescent antibody technique for salmonellae, 465
Fluorometry, for aflatoxin measurement, 213
Food and Drug Administration
attitudes on imitations, 448
Grade-A milk program implemented, 354
report to National Conference on Interstate Milk Shipments, 492
self-certification program, 60
Food-borne diseases
aflatoxins, methods for measurement of, 213
coliforms, enteropathogenic from dairy products, 102
control, training of food-service personnel, 245
perfringens poisoning
review of, 381
detection of, 426
prevention of, recent developments in, 133
salmonellae
control of, 126
detection with fluorescent antibody method, 465
in frozen meat and fish byproducts, 372
survival in butter, 485
survival in Cheddar and Colby cheese, 480
staphylococci
in frozen meat and fish byproducts, 372, 398
methods for recovery from frozen byproducts, 398
viruses, methods for detection in foods, 421
Food industry
microbiological quality control in, 155
sanitation consultant, role of, 295
sanitation in retail, 452
sanitation program for, 179
self-certification, 60
Food sanitation, evaluation of program performance, 115
Food service industry, training in food-borne disease control, 245
Food vending industry, sanitation and safety, 474
Foods, refrigerated, oxidase test applied to, 122
Freeze dried foods, recovery of bacteria from, 390
Frozen meat and fish byproducts
microbiology of, 372, 398
salmonellae in, 372
staphylococci in, 372, 398
IAMFES
affiliate officers, list of, 72
affiliate programs
California, 458

Florida, 194
Indiana, 458
Iowa, 240
Kansas, 457
Minnesota, 460
Missouri, 241
New York, 242

Wisconsin, 29, 458
annual meeting
presidential address, 410
program, 231
report of, 412
awards
citation, 417
honorary life, 417
sanitarian's, 418
committee reports
applied laboratory methods, 194
baking industry equipment, 30
communicable disease affecting man, 270
dairy farm methods, 31, 278
education and professional development, 276
food equipment sanitary standards, 272
food protection, 270
frozen food sanitation, 75
sanitary procedures, 271
committees, list of, 237
instructions to contributors to journal, 287
nomination of officers, 110
objectives to form new association, 41
report of executive secretary, 460
report of journal editor, 407
report of representative to National Mastitis Council, 484
Imitation dairy products
FDA attitudes on, 448
microbiology of, 446
production and processing standards for, 321
In memoriam
Alexander, Wade F., 378
Foltz, Vernon D., 459
Foter, Milton J., 150
Marlett, Howard B., 378
Young, Howard, 459
Insect control, 220
Insecticides, residual, 253
Instructions to contributors to journal, 287
Lamb, bacteria in, 357
Letters to the editor
evils of standard plate count, 219
IAMFES-NAS amalgamation, 219
new approaches for measuring milk quality, 441
the Wisconsin Mastitis test, 473
Leucocyte count
compared to other mastitis tests, 18, 365
direct microscopic somatic cell count, 434, 477
in Spokane mastitis control program, 323
Manpower development and utilization, engineering and sanitation, APHA committee report, 339
Mastitis
can be controlled, 403
catalase test, source and mechanism of catalase activity, 261
correlation among tests for, 18, 365
direct microscopic somatic cell count
development and evaluation, 434
minimizing differences in, 477
milking machine inflations, effect of on, 224
oxidase and Wisconsin Mastitis test compared, 319
progress in control of, 138
Streptococcus agalactiae from herd with low infection level, 259
Meat
byproducts, microbiology of, 372, 398
microorganisms in beef, pork, and lamb, 357
Milk
abnormal, control, progress in, 138
bacterial quality tests, 4
bacterial tests for estimating shelf life, 301
coliforms from Canadian dairy products, 102
coliforms recovered from at 32 and 37 C, 176
dairyman's plight in modern agriculture, 405
dairy spread, low fat, manufacture and keeping quality of, 312
direct microscopic somatic cell count, 434, 477
extraneous matter, tests for, 394, 455
fat tests compared, 203
freezing point of affected by cow's diet, 210
Grade-A program implemented, 354
high bacterial count in caused by cows, 16
manufacturing grade, resazurin test for, 44
mastitis, see Mastitis
medium and incubation temperature for bacterial tests, 90
microorganisms in plant air, 265
microtiter bacterial method for, 144
oxidase test for pasteurized, 49
plant waste effluent, monitoring of, 197
powder, reconstitutability and keeping quality, 183
preliminary incubation of samples, 42
raw and heated for Cheddar cheese, 304
responsibilities for production and quality control, 351
skimmilk, fat tests for, 147
standards for imitation and filled, 321
storage of for bacterial tests, 37
Streptococcus agalactiae in, 259
Milking machine, inflations and udder health, 224
Milko-Tester, compared to Babcock method, 203
Modified Whiteside test, campared to other mastitis tests, 18
Molds, enumerated with aureomycin-rose bengal agar, 442
National Conference on Interstate Milk Shipments
past, present, and future of, 431
proceedings of 12th, 290
report to by Public Health Service, 492
Oxidase test
applied to refrigerated foods, 122
compared to Wisconsin Mastitis test, 319
correlated with plate count and flavor of milk, 49
Pasteurization, detection of leaks in egg pasteurizers, 94
Perfringens poisoning
detection of, 426
review of, 381
Physical methods
applied to apples, 79
detection of leaks in egg pasteurizers, 94
extraneous matter in milk and milk products, 394, 455
fluorometry to measure aflatoxins, 213
temperature measurement in dishwashers, 20
Plate count
correlated with oxidase test, 49
for staphylococci in frozen meat byproducts, 398
medium and incubation for, 90
of imitation dairy products, 446

of low fat dairy spread, 312
preliminary incubation of samples for, 42
storage of milk samples for, 37
to measure quality of raw milk, 4
Pork, bacteria in, 357
Practitioner, environmental health, 28
Protein in diets, 218
Recirculating cleaning, mechanical, 346, 347
Refrigerated foods, oxidase test applied to, 122
Resazurin test, 1 hr for manufacturing milk, 44
Rodent control, 220
Salmonellae
control of, 126
detection of with fluorescent antibody method, 465
infrozen meat and fish byproducts, 372
survival in butter, 485
survival in Cheddar and Colby cheese, 480
Sanitarians
as professionals, 69
challenges for in solid wastes program, 63
manpower development and utilization, 339
role of in community development, 226
training program for at Indiana State University, 489
Sanitation
baking industry standards, 52, 56, 137, 251
CIP systems, bacteria in, 140
consultant, role of in food industry, 295
dishwashers, measurement of temperature in, 20
eat, drink, and be wary, 66
egg pasteurizers, detection of leaks in, 94
extraneous matter in dairy products, 394, 455
food program, evaluation of, 115
in food vending industry, 474
in retail food industry, 452
manpower development and utilization, 339
mechanical recirculating cleaning, 346, 347
microbiological control in food industry, 155
microorganisms in milk plant air, 265
people are biggest problem in, 172
perfringens food poisoning, 381, 426
post-pasteurization contamination, detection of, 206
program for food industry, 179
residual insecticides, 253
responsibilities for milk production and quality control, 350
single-service containers and closures, 329
solid wastes problems and programs, 63
vector control, 220
viruses in foods, detection of, 421
Seafood, degradation of adenine nucleotides in, 1
Self-certification, in food industry, 60
Single-service containers and closures, sanitation of, 329
Skimmilk
fat tests for, 147
powder, reconstitutability and keeping quality, 183
Solid wastes, problems and programs, 63
Standards
for extraneous matter in dairy products, 394
production and processing for imitation and filled dairy products, 394
Staphylococci
in frozen meat and fish byproducts, 372, 398
methods for recovery from frozen feeds, 398
Strip tray test, compared to other mastitis tests, 18
3-A sanitary standards amendments
pasteurizers, high-temperature short-time, 187
plastic materials, 186
3-A Symbol Council
holders of authorizations, 99, 369
report of, 269, 479
Vending, sanitation and safety of, 474
Vermont fat test for skimmilk, 147
Viruses, methods for detection in foods, 421
Visual aids, in training programs, 245
Wisconsin Mastitis test
compared to exidase test, 319
letter to editor, 473
Yeasts, enumerated with aureomycin-rose bengal agar, 442

CONTENTS, VOLUME 32

JANUARY (NO. 1)

Degradation of Adenine Nucleotides in the Muscle of the Dungeness Crab (*Cancer magister*) and King Crab (*Paralithodes camtschatica*) During Storage and Cooking. *H. S. Groninger and K. R. Brandt* ---- 1
The Dairy Industry, Past and Present, in Japan. *Yuzo Inoue* ---- 3
Bacteriological Methods for Evaluation of Raw Milk Quality. A Review. II. Bacterial Tests Used to Measure Milk Quality. *J. C. Hartley, E. R. Vedamuthu, and G. W. Reinbold* ---- 4
Can Cows Cause High Counts? *C. K. Johns* ---- 16
Correlation of Four Mastitis Detection Tests with Respect to the Leucocyte Count. *Christen Jensen and Lyle D. Beck* ---- 18
A Method for Measuring Dish Temperature in Commercial Dishwashers. *A. M. Scalzo, R. W. Dickerson, Jr., and R. B. Read, Jr.* ---- 20
Effective Communications Must Be Two-way. *L. S. Willson* ---- 26
The Environmental Health Practitioner Today and Tomorrow. *Herman Koren* ---- 28
Association Affairs ---- 29
News and Events ---- 33

FEBRUARY (NO. 2)

Effects of Time and Temperature of Grade A Raw Milk Sample Storage on Bacterial Test Results. *J. C. Hartley, E. R. Vedamuthu, G. W. Reinbold, and W. S. Clark, Jr.* ---- 37
Need Objectives to Form New Association. *Roger Lewis* 41
Modification of the Preliminary Incubation Treatment for Raw Milk Samples. *G. W. Reinbold, C. K. Johns, and W. S. Clark, Jr.* ---- 42
Evaluation of the Resazurin Reduction One-Hour test for Grading Milk Intended for Manufacturing Purposes. *Roger Dabbah, W. A. Moats, S. R. Tatini, and J. C. Olson, Jr.* ---- 44
Correlations Between Flavor Score, Flavor Criticism, Standard Plate Count, and Oxidase Count on Pasteurized Milks. *Lester Hankin and Elmer Olin Anderson* ---- 49
Baking Industry Sanitation Standards ---- 52
Baking Industry Sanitation Standards Committee ---- 56
Self-Certification in the Voluntary Compliance Program. *Fred J. Delmore* ---- 60
Solid Wastes Problems and Programs: A Challenge to the Professional Sanitarian. *Donald A. Townley* ---- 63
Eat, Drink, and Be Wary. *Dianne McKaig* ---- 66
Are We Professionals? *J. C. Barringer* ---- 69
Affiliates of IAMFES ---- 72

Association Affairs ---- 73
News and Events ---- 75

MARCH (NO. 3)

Apples From Argentina: Chemical and Physical Characteristics Useful for Technology. *Enrique Rotstein, Melhem S. S. Namor, Ana M. Sica. and Jorge Aruannd* ---- 79
Effects of Medium and Incubation Temperature on Recovery of Microorganisms From Manufacturing-Grade, Grade-A and Pasteurized Milk. *J. C. Hartley, G. W. Reinbold, and E. R. Vedamuthu* ---- 90
Detection of Leaks in the Regeneration Section of Egg Pasteurizers. *Vern F. Kaufman* ---- 94
Holders of 3-A Symbol Council Authorizations on February 20, 1969. ---- 99
Physiological Characteristics of Enteropathogenic and Non-Pathogenic Coliform Bacteria Isolated From Canadian Pasteurized Dairy Products. *Ho-Yu Yang and G. A. Jones* ---- 102
Association Affairs ---- 109
News and Events ---- 112

APRIL (NO. 4)

Evaluation of Performance of a Food Sanitation Program. *O. Lynn Deniston and William W. Welch* --115
Application of the Oxidase Test to Refrigerated Delicatessen Foods. *Lester Hankin and William W. Ullmann* -112
Practical Control of Salmonellae. *John C. Ayres* ----126
Recent Developments in the Prevention of Foodborne Disease. *Keith H. Lewis and Jeptha E. Campbell* ----133
Baking Industry Sanitation Standards Committee ----137
Abnormal Milk Control—A Progress Report. *J. C. Flake* -138
Residual Microorganisms in Cleaned-In-Place Systems for Handling Milk. *R. B. Maxcy* ----140
Microtiter Method for Enumerating Viable Bacteria in Milk. *Daniel . C. Fung and William S. LaGrange* --144
Comparison of Skimmilk Fat Tests and New Vermont Method. *A. H. Duthie, P. H. Foulkes, and H. V. Atherton* ----147
Association Affairs ----150
News and Events ----151

MAY (NO. 5)

Microbiological Quality Control in the Food Industry. *D. A. A. Mossel* ----155
The Bigest Problem in Food Hygiene—People. *F. Oris Blackwell* ----172
Influence of 32 and 37 C Incubation Temperatures on Counts of Coliform Bacteria of Milk. *D. L. Mallett, R. T. Marshall, and J. E. Edmondson* ----176
Alignment of Industry—Oriented Sanitation Program. *Fred. R. Vitale* ----179
Some Recent iVews on Reconstitutability and Keeping Quality of Milk Powder. *Sat Parkash* ----183
Amendment to 3-A Sanitary Standards for Multiple-Use Plastic Materials Used as Product Contact Surfaces for Dairy Equipment ----186
Amendment to 3-A Accepted Practices for the Sanitary Construction, Installation, Testing, and Operation of High-Temperature Short-Time Pasteurizers, Revised (Effective January 22, 1967) ----187
Association Affairs ----193
News and Events ----196

JUNE (NO. 6)

Monitoring Milk Plant Waste Effluent—A New tool for Plant Management. *R. R. Zall and W. K. Jordan* --197
Comparisons of Milkfat Tests on Commercial Milk Samples Determined by the Milko-Tester and Babcock Methods. *Roy E. Ginn and Vernal S. Packard, Jr.* --203
Determining Post-Pasteurization Contamination by a Surface Plate Method. *R. B. Maxcy* ----206
Influence of Changing From Dry-Lot Feeding to Pasture on the Freezing Point of Milk. *B. J. Demott, M. J. Montgomery, and S. A. Hinton* ----210
Improved Procedures for Measurement of Aflatoxins with Thin Layer Chromatography and Fluorometry. *C. N. Shih and E. H. Marth* ----213
Protein for the Spark and the Explosion. *Hatton B. Rogers* ----218
Letters to the Editor ----219
Vector Control Today. *Harry D. Pratt and B. F. Bjornson* ----220
A Research Note—Influence of Narrow and Wide Bore Milking Machine Inflations on Abnormal Milk and Udder Health. *W. M. Dillon, C. M. Brown, J. L. Albright, C. J. Callahan, W. W. Kirkham, and K. M. Weinland* ----224
The Sanitarian and Community Development. *Robert J. Bevins* ----226
Program, 56th Annual IAMFES Meeting ----231
IAMFES List of Committees ----237
Association Affairs ----240
News and Events ----243

JULY (NO. 7)

Use of Visual Aids in Effective Training of Food-Service Management in Foodborne Disease Control. *Frank L. Bryan* ----245
Food and Drug Administration, Training Institute ----250
Baking Industry Sanitation Standards Committee ----251
Recent Developments in Residual Insecticides. *Perry Fisher* ----253
Recovery of *Streptococcus agalactiae* From a Herd of Low Prevalence of Infection; A Method of Surveillance After Elimination of Infection. *G. E. Ward. D. S. Postle, and D. T. Berman* ----259
Sources and Mechanism of Catalase Activity in the Catalase Test for Abnormal Milk. *G. Nageswararao, J. B. Derbyshire, and David T. Berman* ----261
Air Quality in Fluid and Manufcatured Milk Product Plants. *T. I. Hedrick and D. R. Heldman* ----265
Association Affairs ----269
News and Events ----285

AUGUST (NO. 8)

Instructions to Contributors—*Journal of Milk and Food Technology* ----287
Proceedings of the Twelfth National Conference on Interstate Milk Shipments ----290
The Role of an Industry Sanitation Consultant in Food Plant Sanitation as Related to Regulatory Compliance. *Edward L. Holmes* ----295
Tests for Estimating Shelf-Life of Milk and Milk Prodpcts. *C. K. Johns* ----301
Cheddar Cheese: Comparison of Effects of Raw and Heated Milk on Quality and Ripening. *Walter V. Price and Ara O. Call* ----304
Manufacture and Keeping Quality of Low Fat Dairy Spread. *M. C. Goel, H. E. Calbert, and E. H. Marth* -312

A Research Note—A Comparison of the Oxidase Test and the Wisconsin Mastitis Test for the Detection of Abnormal Milk. *C. Vanderzant and R. Nickelson* ..319
Imitation and Filled Milk Dairy Products Production and Processing Standards ..321
The Spokane City Health Department Mastitis Control Program. *Roy T. Olson* ..323
Sanitation in the Single Service Container and Closure Industry—A Status Report. *Fred O. DeSieghardt* ..329
News and Events ..334

SEPTEMBER (NO. 9)

Amended Report of the Committee on Manpower Development and Utilization—Engineering and Sanitation Section, American Public Health Association ..339
Fundamentals of Mechanical Recirculating Cleaning. I. High-Pressure Low-Volume Cleaning. *Harley A. Weisse* ..346
Fundamentals of Mechanical Recirculating Cleaning. II. Recirculation Cleaning. *Dick B. Whitehead* ..347
Inter-Related Responsibilities for Milk Production and Quality Control. *Abraham E. Abrahamson* ..350
Current and Future Status of the Grade-A Milk Program and Its Implementation by the Public Health Service. *Robert E. Novick and Robert A. Stevens* ..354
A Microbiological Examination of Muscle Tissue of Beef, Pork, and Lamb Carcasses. *C. Vanderzant and R. Nickelson* ..357
Shelf Life and Culinary Properties of Thawed Frozen Pasteurized Whole Egg. *D. V. Vadehra, F. R. Steele, Jr., and R. C. Baker* ..362
A Comparison of Screening Tests to Detect Abnormal Milk. *G. Nageswararao and H. E. Calbert* ..365
Holders of 3-A Symbol Council Authorizations on August 20, 1969 ..369
Microbiology of Some Frozen and Dried Feedstuffs. *C. C. Chou and E. H. Marth* ..372
News and Events ..378

OCTOBER (NO. 10)

What the Sanitarian Should Know About *Clostridium perfringens* Foodborne Illness. *Frank L. Bryan* ..381
Influence of Conditions of Rehydration on the Enumeration of Bacteria From Freeze-Dehydrated Model Food Systems. *Carl Vanderzant and K. Hyder* ..390
Estimation of Extraneous Matter in Milk, Cream and Butter. *P. Maloney and J. G. Armstrong* ..394
A Comparison of Direct Plating and Enrichment Methods for Detection and Enumeration of Coagulase-Positive Staphylococci in Frozen Feeds of Animal Origin. *C. C. Chou and E. H. Marth* ..398
Mastitis Can Be Controlled. If. *John H. Nicolai* ..403
The Dairyman's Plight in Modern Agriculture. *Robert F. Behlow* ..405
Report of the Editor, *Journal of Milk and Food Technology* ..407
Rapid Evaluation of Viable Cell Counts by Using the Microtiter System and MPN Technique. *Daniel Y. C. Fung and Allen A. Kraft* ..408
Presidential Address, Fifty-Sixth Annual Meeting, IAMFES. *S. O. Noles* ..410
Fifty-Sixth Annual Meeting of IAMFES ..412
Jones, Faulkner, and McLean Honored at Fifty-Sixth Annual Meeting of IAMFES ..417
News and Events ..V

NOVEMBER (NO. 11)

Surveillance Methods for Viruses in Foods. *D. O. Cliver and J. Grindrod* ..421
Current Developments in Detection of Microorganisms in Foods—*Clostridium perfringens*. *Herbert E. Hall* ..426
The National Conference on Interstate Milk Shipments—Past, Present, and Future. *Shelby Johnson* ..431
Development and Evaluation of the Direct Microscopic Somatic Cell Count (DMSCC) in Milk. *J. W. Smith* ..434
Letter to the Editor. *C. K. Johns* ..441
An Aureomycin-Rose Bengal Agar for Enumeration of Yeast and Mold in Cottage Cheese. *W. W. Overcast and David J. Weakley* ..442
A Research Note-Microbiology of Imitation and Filled Dairy Products and Their Components. *Cynthia A. Smutz, V. D. Foltz, and Ross Mickelsen* ..446
Food and Drug Administration Attitudes on Imitation. *Robert W. Weik* ..448
Sanitation in the Retail Food Industry. *Gale Prince* ..452
Mixed Sample Tests for Extraneous Matter in Milk. *P. Maloney and J. G. Armstrong* ..455
Association Affairs ..457
News and Events ..461

DECEMBER (NO. 12)

Salmonellae and the Fluoroscent Antibody Technique: A Current Evaluation. *J. M. Goepfert and N. F. Insalata* ..465
Letter to the Editor. *D. I. Thompson* ..473
Vending Sanitation and Safety—A Current Report. *David E. Hartley* ..474
A Procedure to Minimize Differences in Expected Coefficient of Variation in the Direct Microscopic Somatic Cell Count. *W. D. Schultze and J. W. Smith* ..477
Report of the 3-A Symbol Council, 1968-1969 ..479
Factors Affecting Survival of *Salmonella* in Cheddar and Colby Cheese. *R. E. Hargrove, F. E. McDonough, and W. A. Mattingly* ..480
Report of IAMFES Representative to the National Mastitis Council, 1968-1969 ..484
Effects of Time and Temperature on Salmonellae in Inoculated Butter. *J. E. Sims, D. C. Kelley, and V. D. Foltz* ..485
Indiana State University's Answer to the Environmental Health Manpower Shortage. *Herman Koren* ..489
The Public Health Service's Report to the National Conference on Interstate Milk Shipments. *Harold E. Thompson, Jr.* ..492
News and Events ..495
Journal of Milk and Food Technology, Index to Volume 32 ..498
